

DEEPOCEAN

Implementing innovative solutions to our customer's subsea challenges

Delivering safe, high quality, innovative services and technologies for the subsea industry

OUR PURPOSE

DeepOcean is in business to generate industry leading returns for all its stakeholders through the provision of safe, quality and innovative Subsea Services, while embodying a dynamic, fun and winning culture to attract and retain the best talent in the industry.

CORE VALUES

- Safety
- Teamwork
- Customer Focus
- Innovation
- Integrity

DeepOcean is an integrated provider of safe, high quality, innovative services and technologies for the subsea industry. Demonstrating an extensive track record, DeepOcean offers a breadth of subsea services including Survey and Seabed-mapping, Subsea Installation, Seabed Intervention, Inspection, Maintenance and Repair (IMR), and Decommissioning.

This strong portfolio of services, coupled with a fleet of owned and controlled specialised equipment and multi-purpose support spreads, enables DeepOcean to bundle its subsea services to deliver cost-effective, tailored solutions to meet individual client needs.

DeepOcean strives for relentless customer focus and operational excellence, which is supported by a global team of highly professional and experienced project teams. The company delivers innovative engineering solutions and turnkey project management for complex offshore operations.

Operating in the oil and gas, offshore renewables and power transmission industries, DeepOcean is an efficient offshore service provider with offices in Norway, UK, Holland, Brazil, Mexico and Singapore.

SURVEY AND SEABED-MAPPING

- Seabed mapping
- Route survey
- Pipeline inspection
- Lay support
- Cable survey

SUBSEA INSTALLATION

- Cable lay
- Flexible product and umbilical
- Life of Field Seismic (LoFS) systems
- Subsea structures
- Diverless subsea installation

SEABED INTERVENTION

- Trenching
- Ploughing
- Excavation and dredging

DECOMMISSIONING

- Pre and post survey
- Cutting and recovery
- Pipeline removal by burial
- Removal of subsea structures
- Towing and transport
- Disposal

INSPECTION, MAINTENANCE AND REPAIR (IMR)

- Structure inspection
- Cable inspection
- Remotely operated tool operations
- Scale squeeze operations
- Maintenance of subsea systems
- Repair of subsea systems
- Pipeline and cable repair
- Wind turbine scour survey and monitoring
- Commissioning
- Module replacement

ASSETS

DeepOcean controls a fleet of owned and chartered subsea service and installation vessels and highly specialised equipment including;

- DP2 construction, installation, trenching and subsea support vessels
- Joint venture cable installation barge
- Mechanical trenchers
- Pipeline and cable ploughs
- Jet trenching ROVs
- Work class ROVs
- Survey ROVs
- Observation class ROVs
- Module handling systems
- 2,000te capacity carousel (upgradeable to 4,000te)
- Marine mobilisation base facilities

PEOPLE

DeepOcean has a global team of over 1,000 highly professional and experienced employees with a range of capabilities covering design, project engineering, geotechnical, project management and operational expertise.
